This Prospectus is a transaction specific prospectus for an offer of continuously quoted securities (as defined in the Corporations Act) and has been prepared in accordance with section 713 of the Corporations Act. It does not contain the same level of disclosure as an initial public offering prospectus and is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

Representations contained in this Prospectus are made taking into account that the Company is a disclosing entity for the purposes of the Corporations Act and certain matters are publicly available information or may reasonably be expected to be known to investors and professional advisers whom prospective investors may consult.

Forward-looking statements

This Prospectus contains forward-looking statements which are identified by words such as 'may', 'could', 'believes', 'estimates', 'targets', 'expects', or 'intends' and other similar words that involve risks and uncertainties.

These statements are based on an assessment of present economic and operating conditions, and on a number of assumptions regarding future events and actions that, as at the date of this Prospectus, are expected to take place.

Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties, assumptions and other important factors, many of which are beyond the control of the Company, the Directors and the Company's management.

Overseas shareholders

These Offers do not, and is not intended to, constitute an offer in

any place or jurisdiction in which, or to any person to whom, it would not be lawful to make such an offer or to issue this Prospectus.

It is not practicable for the Company to comply with the securities laws of overseas jurisdictions having regard to the number of overseas Shareholders, the number and value of Shares these Shareholders would be offered and the cost of complying with regulatory requirements in each relevant jurisdiction. Accordingly, the Offers are not being extended and Securities will not be issued to Shareholders with a registered address which is outside Australia, New Zealand or the United Kingdom.

For further information on overseas Shareholders please refer to Section 3.10.

Continuous disclosure obligations

The Company is a "disclosing entity" (as defined in section 111AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Securities.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the three months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Please refer to Section 7.2 for further details.

Company Website

No documents or other information available on the Company's website is incorporated into this Prospectus by reference.

Financial forecasts

The Directors have considered the matters set out in ASIC Regulatory Guide 170 and believe that they do not have a reasonable basis to

forecast future earnings on the basis that the operations of the Company are inherently uncertain. Accordingly, any forecast or projection information would contain such a broad range of potential outcomes and possibilities that it is not possible to prepare a reliable best estimate forecast or projection.

Clearing House Electronic Sub-Register System (CHES) and Issuer Sponsorship

The Company will apply to participate in CHES, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHES will be issuer sponsored by the Company.

Electronic sub-registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with statements (similar to a bank account statement) that set out the number of Securities issued to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHES and issuer sponsorship.

Electronic sub-registers also mean ownership of securities can be transferred without having to rely upon paper documentation. Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

Photographs used in this Prospectus which do not have descriptions are for illustration only and should not be interpreted to mean that any person shown endorses the Prospectus or its contents or that the assets shown in them are owned by the Company. 2.2 Details of Substantial Holders

Based on publicly available information as at the date of this Prospectus, those persons which (together with their associates) have a relevant interest in 5% or more of the Shares on issue are set out below:

Shareholder	Shares	%
Computershare Clearing Pty Ltd <CCNL DI A/C> ¹	82,217,440	19.49
Timothy Paul Neesham	24,448,605	5.80

Notes:

1. This entity's interest in the Company's Shares represents the Depository Interests held by the Depository Interest Holders, in proportion to the total number of Shares on issue.
2. The voting power in the table is prior to settlement of the Offers.

In the event all Entitlements are accepted there will be no change to the substantial holders on completion of the Offers.

2.3 Underwriting

The Company has entered into an underwriting agreement (**Underwriting Agreement**) with CPS Capital Group Pty Ltd (**CPS** or **Underwriter**), pursuant to which the Underwriter has agreed to fully underwrite the Entitlement Offer.

Pursuant to the Underwriting Agreement, the Underwriter will receive the following fees:

- (a) an underwriting fee equivalent to 6% of the gross amount raised under the Entitlement Offer; and
- (b) the issue of up to 48,851,643 Underwriter Options (subject to Shareholder approval being obtained at the General Meeting).

CPS is also engaged by the Company to provide consultancy services, which are invoiced on a monthly basis of \$6,000 plus GST, for a minimum 12 month term.

Further terms of the underwriting are set out in Section 7.4.

2.4 Effect on Control

The Underwriter and its advisers hold an interest in 35,678,605 Shares and 8,938,816 Options in the Company. The issue of Shares and New Options under this Prospectus to the Underwriter may increase its interest in the Company and dilute the Shareholding of other Shareholders to the extent they elect not to participate in the Entitlement Offer or are ineligible to participate in the Entitlement Offer.

In accordance with the terms of the Underwriting Agreement, the Underwriter will allocate the shortfall to its sub-underwriters and/or clients and people who have otherwise agreed to assist with the completion of the Entitlement Offer such that neither the Underwriter, the sub-underwriters nor any of the Underwriter's clients, individually, will have a voting power in the Company in excess of 19.9% after the issue of the shortfall.

The Company, in consultation with the Underwriter, will ensure that the Entitlement Offer (including the equitable dispersion of any Shortfall Securities) complies with the provisions of Chapter 6 of the *Corporations Act 2001* (Cth) and is otherwise consistent with the policy guidelines contained in ASIC Regulatory Guide 6 and Takeovers Panel Guidance Note 17.

2.5 Potential dilution on non-participating Shareholders

Shareholders should note that if they do not participate in the Entitlement Offer, their holdings are likely to be diluted by approximately 20% (as compared to their holdings and number of Shares on issue as at the date of this Prospectus).

No immediate dilution will occur as a result of the issue of New Options and Underwriter Options under this Prospectus. However subsequent exercise of any or all of the New Options and Underwriter Options will result in dilution. Assuming all New Options and Underwriter Options offered pursuant to this Prospectus are issued and exercised into Shares, Shareholders who do not participate in the Offer, are likely to be diluted by an aggregate of approximately 32.68% (as compared to their holdings and number of Shares on issue as at the date of the Prospectus).

For illustrative purposes, the table below shows how the dilution may impact the holdings of Securityholders:

Holder	Holding as at Record date	% at Record Date	Entitlements under the Entitlement Offer	Holdings if Entitlement Offer not taken Up	% post Offer
Shareholder 1	10,000,000	2.26%	2,500,000	10,000,000	1.81%
Shareholder 2	5,000,000	1.13%	1,250,000	5,000,000	0.90%
Shareholder 3	1,500,000	0.34%	375,000	1,500,000	0.27%
Shareholder 4	400,000	0.09%	100,000	400,000	0.07%
Shareholder 5	50,000	0.01%	12,500	50,000	0.01%

Notes:

1. This is based on a share capital of 442,219,721 Shares as at the date of the Prospectus and assumes no Options currently on issue or other Shares are issued and also assumes no New Options, Underwriter Options or Performance Rights are exercised.
2. The dilutionary effect shown in the table is the maximum percentage on the assumption that those entitlements not accepted by eligible holders are placed under the underwriting and Shortfall Offer.

are the holder of an account with an Australian financial institution that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

You should be aware that your own financial institution may implement earlier cut-off times with regard to electronic payment, and you should therefore take this into consideration when making payment. **It is your responsibility to ensure that funds submitted through BPAY® are received by 5:00pm (WST) on the Closing Date. The Company shall not be responsible for any delay in the receipt of the BPAY® payment.**

Guidance where you have more than one CRN (Shareholding of Shares)

If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those Shareholdings only use the CRN specific to that Shareholding as set out in the applicable Entitlement and Acceptance Form. **Do not use the same CRN for more than one of your Shareholdings.** This can result in your Application monies being applied to your Entitlement in respect of only one of your Shareholdings (with the result that any Application in respect of your remaining Shareholdings will not be valid).

(b) By Electronic Funds Transfer (overseas applicants)

For payment by Electronic Funds Transfer (**EFT**) for overseas Eligible Holders, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via EFT if you are the holder of an account that supports EFT transactions to an Australian bank account. Please note that should you choose to pay by EFT:

- (i) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form;
- (ii) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application monies; and
- (iii) if you pay more than is required to subscribe for your Entitlement, you will be taken to have applied for Shortfall Securities (if any) under the Shortfall Offer, to the extent of the excess.

(c) **By Cheque**

Payment by cheque or cash will not be accepted.

3.5 Implications of an acceptance

Returning a completed Entitlement and Acceptance Form or paying any Application monies by BPAY® or EFT will be taken to constitute a representation by you that:

- (a) you have received a copy of this Prospectus and the accompanying Entitlement and Acceptance Form, and read them both in their entirety;
- (b) you acknowledge that once the Entitlement and Acceptance Form is returned, or a BPAY® or EFT payment instruction is given in relation to any Application monies, the application may not be varied or withdrawn except as required by law.

3.6 Minimum subscription

There is no minimum subscription to the Offers.

3.7 Shortfall Offer

Any Entitlement not taken up pursuant to the Entitlement Offer will form the Shortfall Offer (**Shortfall Securities**). The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Share (Depositary Interest) to be issued under the Shortfall Offer shall be \$0.03 (£0.016), being the price at which Shares (Depositary Interests) have been offered under the Offer.

If you do not wish to take up any part of your Entitlement, you are not required to take any action. That part of your Entitlement not taken up will form part of the Shortfall Offer and potentially be allocated to other Eligible Holders or other third parties as part of the Shortfall Offer. The Shortfall Offer will only be available where there is a Shortfall between applications received from Eligible Holders and the number of Securities proposed to be issued under the Entitlement Offer.

Eligible Holders who wish to subscribe for Securities above their Entitlement are invited to apply for Shortfall Securities under the Shortfall Offer by making payment for such Shortfall Securities in accordance with Section 3.4.

Allocation of the Shortfall Securities will be at the discretion of the Board in conjunction with the Underwriter and will otherwise be subject to the terms of the Underwriting Agreement, details of which are set out in Section 7.4. If the Entitlement Offer is oversubscribed (by take up of Entitlements and applications for Shortfall Securities by Eligible Holders), scale back will be applied to applications under the Shortfall Offer on a pro-rata basis to the respective shareholdings of Eligible Holders. There is no guarantee that Eligible Holders will receive Securities applied for under the Shortfall Offer.

The Underwriter notes that no Securities will be issued to an applicant under this Prospectus or via the Shortfall Offer if the issue of Securities would contravene the takeover prohibition in section 606 of the Corporations Act. Similarly, no Securities will be issued via the Shortfall Offer to any related parties of the Company.

The fact that ASX may grant Official Quotation to the Shares and New Options is not to be taken in any way as an indication of the merits of the Company or the Securities now offered for subscription.

Application for trading on the AIM of the Shares offered pursuant to this Prospectus will be made in due course.

The Company will not apply for Official Quotation of the Underwriter Options issued pursuant to this Prospectus.

Pending the issue of the Securities or payment of refunds pursuant to this Prospectus, all Application monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company, however, will be entitled to retain all interest that accrues on the bank account and each Applicant waives the right to claim interest.

Holding statements for Securities issued under the Offers will be mailed as soon as practicable after the issue of Securities and for Shortfall Securities issued under the Shortfall Offer as soon as practicable after their issue.

(a) Going concern risk

In the Company's annual report for the financial year ended 30 June 2023, lodged with ASX on 29 September 2023, the Notes to the Consolidated Financial Statements contained a note in relation to going concern.

The note draws attention to Note 2(a) of the financial report which describes the events and/or conditions which give rise to the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern and therefore the Company may be unable to realise its assets and discharge its liabilities in the normal course of business.

For the Company to continue to carry out its exploration activities, meet its expenditure requirements and continue as a going concern it is dependent on securing additional funding. The Directors are satisfied they will be able to raise additional working capital as required and thus it is appropriate to prepare the financial statements on a going concern basis.

(b) **Exploration and Operating Risk**

The tenements in which the Company has an interest (**Tenements**) are still subject to exploration. Mineral exploration and development are high-risk undertakings and there can be no assurance that future exploration of the Tenements, or any other mineral licences that may be acquired in the future will result in the discovery of an economic resource. Even if an apparently viable resource is identified, there is no guarantee that it can be economically exploited.

The future exploration activities of the Company may be affected by a range of factors including geological conditions, limitations on activities due to seasonal weather patterns or adverse weather conditions, unanticipated operational and technical difficulties, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, industrial and environmental accidents, industrial disputes, unexpected shortages and increases in the costs of consumables, spare parts, plant, equipment and staff, native title process, changing government regulations and many other factors beyond the control of the Company.

The success of the Company will depend upon:

- (i) the Company's ability to maintain title to the Tenements;
- (ii) the Company being able to delineate economically mineable resources and reserves;
- (iii) positive movements in the price of platinum group metals and exchange rate fluctuations;
- (iv) the Company obtaining all consents and approvals (including environmental approvals) necessary to conduct its exploration activities; and
- (v) the successful management of development operations.

In the event that Company's exploration programs prove to be unsuccessful, this could lead to a diminution in the value of the Tenements, a reduction in the cash reserves of the Company and possible relinquishment of Tenements.

Until the Company is able to realise value from its Tenements, it is likely to incur ongoing operating losses.

(c) **Metallurgy**

Whilst a significant amount of metallurgical test work has been completed on the Project further test work is required to confirm metallurgical performance across variable composites.

(d) **Resources and Reserves**

There is a Mineral Resource Estimate in respect of the Company's Panton PGM Project. There are currently no Reserve estimates in respect of any of the Tenements. Reserve and Resource estimates are expressions of judgement based on knowledge, experience and

industry practice. Estimates which were valid when initially calculated may alter significantly when new information or techniques become available. In addition, by their very nature Resource and Reserve estimates are imprecise and depend to some extent on interpretations which may prove to be inaccurate.

(e) **Commodity Price Volatility and Exchange Rate Risk**

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for platinum group metals, technological advancements, forward selling activities and other macroeconomic factors (such as inflation, interest rates, currency exchange rates and global and regional demand for, and supply of platinum group metals).

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

(f) **Environmental Risks**

The operations and proposed activities of the Company in Australia are subject to State and Federal laws and regulation concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

There is also a risk that environmental laws and regulations may become more onerous, making the Company's operations more expensive.

(g) **Title Risks and Native Title**

Interests in tenements in Australia are governed by the respective State legislation and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments. Additionally, tenements are subject to periodic renewal. There is no guarantee that current or future tenements and/or applications for tenements or renewal of tenements will be approved.

It is also possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest, there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. The existing Mining Leases constituting the Panton PGM Project were granted prior to the enactment of the Native Title Act 1993 (Cth), however, on further renewal of those leases (not due until 2028) it

is expected that the renewal will need to comply with the future act provisions of the Native Title Act 1993 (Cth). In respect of any other tenements that the Company may acquire, if native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be adversely affected.

The Directors will closely monitor the potential effect of native title claims involving tenements in which the Company has or may have an interest.

(h) **Exploration Costs**

The exploration costs of the Company are based on certain assumptions with respect to the method and timing of exploration. By their nature, these estimates and assumptions are subject to significant uncertainty, and accordingly, the actual costs may materially differ from the estimates and assumptions. Accordingly, no assurance can be given that the cost estimates and the underlying assumptions will be realised in practice, which may materially and adversely affect the Company's viability.

(i) **Mine Development**

Possible future development of mining operations at the Tenements is dependent on a number of factors including, but not limited to, the acquisition and/or delineation of economically recoverable mineralisation, favourable geological conditions, receiving the necessary approvals from all relevant authorities and parties, seasonal weather patterns, unanticipated technical and operational difficulties encountered in extraction and production activities, mechanical failure of operating plant and equipment, shortages or increases in the price of consumables, spare parts and plant and equipment, cost overruns, access to the required level of funding and contracting risk from third parties providing essential services.

If the Company commences production on any of the Tenements, its operations may be disrupted by a number of risks and hazards which are beyond the control of the Company. No assurance can be given that the Company will achieve commercial viability through the development of the Projects.

The risks associated with the development of a mine will be considered in full, should the Tenements reach that stage.

(j) **Information Accuracy Risk**

The Company has acquired mining information in relation to its Tenements compiled by previous explorers. Any inaccuracies in that information could adversely affect the Company's ability to implement its planned exploration program.

(k) **Climate**

There are a number of climate related factors that may affect the operations and proposed activities of the Company, including, the emergence of new or expanded regulations associated with the transitioning to a lower-carbon economy and market challenges

related to climate change mitigation. The Company may be impacted by changes to local or international compliance regulations related to climate change mitigation efforts, or by specific taxation or penalties for carbon emissions or environmental damage. While the Company will endeavour to manage these risks and limit any consequential impacts, there can be no guarantee that the Company will not be impacted by these occurrences.

Climate change may also cause certain physical and environmental risks that cannot be predicted by the Company, including events such as increased severity of weather patterns and incidence of extreme weather events and longer-term physical risks such as shifting climate patterns. All these risks associated with climate change may significantly change the industry in which the Company operates.

6.3 General risks

(a) Additional requirements for capital

The Directors consider the Company has sufficient funds to meet the immediate objectives of the Company. Additional funding may be required in the event costs exceed the Company's estimates and to effectively implement its business and operational plans in the future, to take advantage of opportunities for acquisitions, joint ventures or other business opportunities, and to meet any unanticipated liabilities or expenses which the Company may incur. If such events occur, additional funding will be required.

The Company may seek to raise further funds through equity or debt financing, joint ventures, or other means. Failure to obtain sufficient financing for the Company's activities may result in delay and indefinite postponement of their activities and the proposed exploration and development strategy. There can be no assurance that additional finance will be available when needed or, if available, the terms of the financing may not be favourable to the Company and might involve substantial dilution to Securityholders.

(b) Reliance on key personnel

The Company's future depends, in part, on its ability to attract and retain key personnel. It may not be able to hire and retain such personnel at compensation levels consistent with its existing compensation and salary structure. Its future also depends on the continued contributions of its executive management team and other key management and technical personnel, the loss of whose services would be difficult to replace. In addition, the inability to continue to attract appropriately qualified personnel could have a material adverse effect on the Company's business.

(c) Economic and financial market risks

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's activities, as well as on its ability to fund those activities.

Further, share market conditions may affect the value of the Securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) interest rates and inflation rates;
- (iii) currency fluctuations;
- (iv) changes in investor sentiment toward particular market sectors;
- (v) the demand for, and supply of, capital; and
- (vi) terrorism or other hostilities.

The market price of Securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(d) **Force majeure**

The Company, now or in the future, may be adversely affected by risks outside the control of the Company including labour unrest, civil disorder, war, subversive activities or sabotage, extreme weather conditions, fires, floods, explosions or other catastrophes, epidemics or quarantine restrictions.

(e) **Trading price of Shares**

The Company's operating results, economic and financial prospects and other factors will affect the trading price of the Shares. In addition, the price of Shares is subject to varied and often unpredictable influences on the market for equities, including, but not limited to, general economic conditions including the performance of the Australian dollar on world markets, inflation rates, foreign exchange rates and interest rates, variations in the general market for listed stocks in general, changes to government policy, legislation or regulation, industrial disputes, general operational and business risks and hedging or arbitrage trading activity that may develop involving the Shares.

In particular, the share prices for many companies have been and may in the future be highly volatile, which in many cases may reflect a diverse range of non-company specific influences such as global hostilities and tensions relating to certain unstable regions of the world, acts of terrorism and the general state of the global economy. No assurances can be made that the Company's market performance will not be adversely affected by any such market fluctuations or factors.

(f) **Government Policy Changes**

Adverse changes in government policy or legislation may affect ownership of mineral interests, taxation, royalties, land access, labour relations and mining and exploration activities of the Company. It is possible that the current system of exploration and mine permitting in the jurisdictions where the Company's assets are or will be located may change, resulting in impairment of rights and possibly expropriation of the Company's properties without adequate compensation.

(g) **Litigation risk**

The Company is exposed to possible litigation risks including native title claims, tenure disputes, environmental claims, occupational health and safety claims and employee claims. The Company may also be involved in disputes with third parties in the future which may result in litigation. Should any such claim or dispute be determined not in the Company's favour, this may impact adversely on the Company's operations, financial performance and financial position.

(h) **Insurance**

The Company intends to obtain insurance for its operations in accordance with industry practice. However, the Company's insurance may not be of a nature or level to provide adequate insurance against all possible risks to the Company. The occurrence of an event that is not fully covered by insurance could have a material adverse effect on the Company.

Insurance of all risks associated with mineral exploration or production is not always available, and where available, the costs of such insurance may be prohibitive.

(i) **International Conflict**

The current conflict between Ukraine and Russia and Israel and Palestine (**International Conflict**) is impacting global economies and financial markets. The nature and extent of the effect the International Conflict may have on the Company's operations remains uncertain at this time. In the short to medium term, the Company's Share price may be adversely affected by the economic uncertainty caused by the International Conflict and the wider effect the conflict has on global economies and financial markets.

The Directors are monitoring the potential secondary and tertiary macroeconomic impacts of the International Conflict, including the fluctuations in commodity and energy prices and the potential risk of cyber activity impacting governments and businesses. Further, any governmental or industry measures taken in response to the International Conflict, including limitations on travel and changes to import/export restrictions and arrangements involving parties involved in the International Conflict, may adversely impact the Company's operations and are likely to be beyond the control of the Company. The Company is monitoring the situation closely and considers the impact of the International Conflict on the Company's business and financial performance to, at this stage, be limited. However, the situation is continually evolving, and the consequences are therefore inevitably uncertain.

6.4 Speculative investment

The risk factors described above, and other risk factors not specifically referred to, may have a materially adverse impact on the performance of the Company and the value of the Securities.

Prospective investors should consider that an investment in the Company is highly speculative.

There is no guarantee that the Securities offered under this Prospectus will provide a return on capital, payment of dividends or increases in the market value of those Securities.

Before deciding whether to subscribe for Securities under this Prospectus you should read this Prospectus in its entirety and consider all factors, taking into account your objectives, financial situation and needs.
